Add Your Name: Urban Limit Line Threatened! Over 9,000 acres of Contra Costa County's Open Space At Risk! Stop urban sprawl in Tassajara Valley!

A high-density 125 home development ("Tassajara Parks") is being proposed for the undeveloped portion of Tassajara Valley east of Danville. **The development is outside the voter mandated Urban Limit Line ("ULL") that prohibits urban development outside the line and into the county's protected agricultural lands and open spaces.** If the county supervisors approve this development, it will establish a precedent for other developers to follow, and put **at risk over 9,000 acres** of voter approved protected lands in the county to further development.

Add your name to telling the county's supervisors to reject this development proposal and respect the will of the county's voters that the Urban Limit Line means "no development outside of the line".
